Ms. Leung Kit Yin
Shatin Tsung Tsin Secondary School

13 March 2024

Dear Ms. Leung

Greetings from the Department of Systems Engineering and Engineering Management, The Chinese University of Hong Kong (CUHK). We are pleased to share with you the good news that the following student, a graduate of your school, has been selected as one of the departmental scholarship recipients based on his high academic accomplishments at CUHK:

Department of SEEM Scholarship: **NGAI Cheuk Hei (Bachelor of Engineering in Financial Technology, Year 4).**

It is our pleasure to have such an outstanding student in our department. We believe that the time spent at your school and the guidance of your teachers would have been of great help to the student. Thank you very much.

Taking this opportunity, please allow us to provide information about our department. Our department was established in the year 1991 as the first of its kind in tertiary educational institutions in Hong Kong. The Department offers two undergraduate programmes: the Bachelor of Engineering in Systems Engineering and Engineering Management (SEEM) and the Bachelor of Engineering in Financial Technology (FTEC).

1. SEEM Programme trains students to utilize technologies (e.g., machine learning, big data analytics, and AI) and mathematical tools (e.g., optimization, probability, and simulation) to tackle decision-making problems for businesses. Industrial applications include, but not limited to, financial investment decisions and risk management, logistics and supply chain management, service management, and business information system development and management.
2. FTEC Programme offers well-balanced knowledge of technological innovations (e.g., machine learning, big data analytics, AI, and blockchain) and FinTech applications (e.g., e-payment, cryptocurrencies, virtual banking, robo-advisor, RegTech, and InsurTech). This programme trains students to improve/revolutionize financial services and to meet strong demands for FinTech professionals in the coming decades.

Apart from those mentioned above, the two programmes provide a variety of opportunities to help students map out their career paths, including industry internships, double majors, and dual degrees. For more information, please visit <https://seem.se.cuhk.edu.hk/> (SEEM) and <https://fintech.se.cuhk.edu.hk/> (FTEC).

Your continued interest and support would be highly appreciated.

Yours sincerely,

Department of Systems Engineering and Engineering Management
The Chinese University of Hong Kong
